

Check Transport Lenses and Pathways Dirty with Paper Dust and Ink Residue?

Remove dirt and ink buildup easily with a Canon approved cleaning card.

How Waffletechnology Works?

Waffletechnology is an advancement in cleaning card technology. The Cleaning waffles are flexible raised platforms. These platforms allow the card to clean previously unreachable areas within the check scanner. Now more dirt is removed making your check scanner cleaner and more reliable than ever before.

Canon CR-25, CR-55 and CR-180 Check Transport Cleaning Card with Waffletechnology

Ideal Cleaning on

Canon Check Transport

Canon CR-25, CR-55 and CR-180 Check Transport Cleaning Card with Waffletechnology is an approved product by Canon. This product was developed and tested to be an effective means of maintaining this equipment through a joint development project between Canon and the engineers at Waffletechnology™

Check Transports accumulate dirt from the pollutants in the environment and by being handled. This dirt collects and clouds the optical lenses inside which are the most critical component of the transport. These optics allow the imaged check to become a legal document for check clearing as stated in the Check 21 law. The ability of the transport to properly create the image is why the optics are the most critical component of the transport.

Canon CR-25, CR-55 and CR-180 Check Transport Cleaning Card with Waffletechnology were developed to clean the transports optics of built up dirt and ink. In addition, it will also clean the transport roller mechanisms that allow the check to pass through the scanner. This card, when used as a consistent maintenance product, will keep your Canon Check Transport Units performing as designed.

Available in boxes of 15 cards.

Find out how to maintain all your transaction equipment:

- Receipt Printers
- Check Readers / Scanners
- Credit/Debit Card Readers
- Touch Screen Monitors
- Currency Counters
- ATM's and Many More.
