

Money Slipping Through Your Currency Counters?

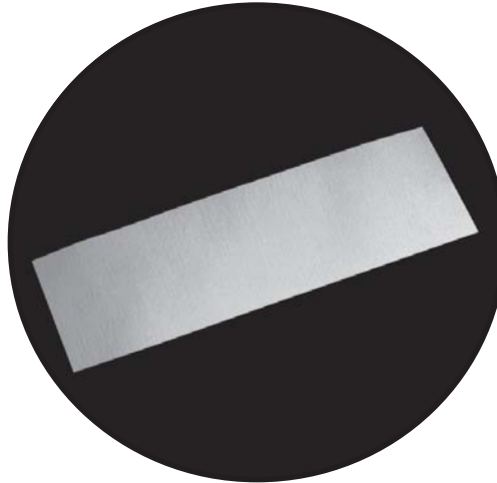

Clean transport belts and rollers regularly for efficient and accurate currency handling.

How Do Cleaning Cards Work?

Cleaning card technology allows for a thorough cleaning of transaction devices, such as card and check readers, ATM's and receipt printers, without costly outside technical assistance. Used as preventive maintenance or to quickly correct device errors, these products remove dirt, and other contaminants which inhibit the device from working properly.

Each transaction device requires specific cleaning products. Choose the right product for your device for proper maintenance.

Currency Counter Cleaning Cards

Ideal Cleaning on

Currency Counters

Currency Counters are at nearly every teller station in Bank Branch offices around the world. These convenient work horses allow for accurate counting quickly throughout the day. The rollers and belts inside the unit spin at high speeds to transport the currency through the equipment. Currency deposits dirt and oils into the machine through normal operation. These contaminants build up on the belts and rollers until they begin to slip, causing bills to misfeed and jam in the unit.

Currency Counter Cleaning Cards are designed to remove these contaminants quickly. Safe and effective, this product is inserted as you would any currency into the machine, making it very easy to use. As it feeds into the counter, it cleans the transport belts and rollers, bringing the equipment back to full functioning operation in seconds.

Available in boxes of 25 cards

Find out how to maintain all your transaction equipment: • Receipt Printers • Check Readers / Scanners • Credit/Debit Card Readers • Touch Screen Monitors • Currency Counters and Many More. • ATM's More.
