

## Paper Flash, Ink Residue and Dirt Building Up in Your Scanner?

Eliminate wear and tear buildup with an Epson approved cleaning card.

### How Waffletechnology Works?

Waffletechnology™ is an advancement in cleaning card technology. The Cleaning waffles are flexible raised platforms. These platforms allow the card to clean previously unreachable areas within the check scanner. Now more dirt is removed making your check scanner cleaner and more reliable than ever before.

### Waffletechnology™ Cleaning Card

### Ideal Cleaning on

CaptureOne™  
Check Scanners

Waffletechnology™ Cleaning Cards are an approved product by Epson for use on the CaptureOne™ Check Scanner. This product was developed and tested by engineers at Waffletechnology, with cooperation from Epson, to be an effective means of maintaining this equipment.

Checks Scanners accumulate dirt from the pollutants in the environment and by the checks being processed. This dirt collects and clouds the optical lenses inside which are the most critical component of the scanner. These optics allow the imaged check to become a legal document for check clearing as stated in the Check 21 law. The ability of the scanner to properly create the image is why the optics are the most critical component of the scanner.

Waffletechnology™ Cleaning Cards were developed for Epson CaptureOne™ Check Scanners to clean the scanners optics of built up dirt and ink. In addition, it will also clean the magnetic heads and the transport roller mechanisms that allow the check to pass through the scanner. This card, when used as a consistent maintenance product, will keep your Epson CaptureOne™ Check Scanner performing as designed.

Available in boxes of 15 cards.
