

Vending Credit Card Readers Fail to Read Credit Cards?

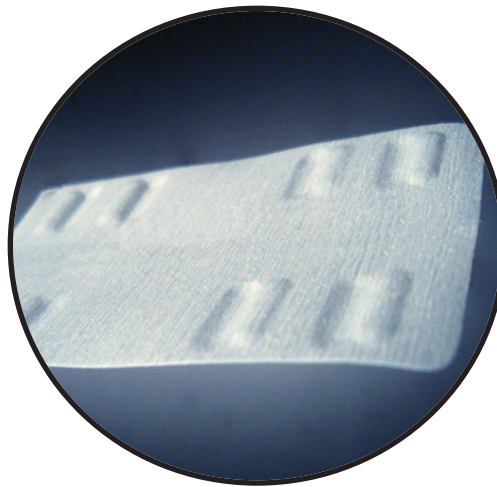

Correct misreads with a simple swipe of the Waffletechnology Card Reader Cleaning Card.

How Waffletechnology Works?

Waffletechnology is an advancement in cleaning card technology. The Cleaning waffles are flexible raised platforms. These platforms allow the card to clean previously unreachable areas within the card reader. Now more dirt is removed making your reader cleaner and more reliable than ever before.

Waffletechnology Card Reader Cleaning Cards

Ideal Cleaning on

Credit Card Readers

POS Readers

ATM's

Credit card readers on vending machines is on the rise as consumers carry less cash and rely more on their Debit Cards for even small transactions. These card readers accumulate the dust and dirt particles that are in every environment. Some more than others depending on the location of the card reader. Over time this accumulated dirt will cause misreads and leave the customer empty handed.

The Waffletechnology Card Reader Cleaning Card is designed to remove the dirt form the sensitive read heads inside the card reader. In addition, because of the unique cleaning waffles, dirt is also removed from the pathways of the card reader. In this way your next customer is not moving dirt back on to the read head causing future misreads on your customers credit cards.

Available in boxes of 40
