

Are Your Bill Acceptors Rejecting More Money Than They Accept?

Remove built up dirt for increased acceptance in seconds.

How Waffletechnology Works?

Waffletechnology is an advancement in cleaning card technology. The Cleaning waffles are flexible raised platforms. These platforms allow the card to clean previously unreachable areas within the bill acceptor. Now more dirt is removed making your validator cleaner and more reliable than ever before.

Lucky Stripe Waffletechnology Bill Acceptor Cleaning Cards

Ideal Cleaning on

Vending Machines

Change Machines

Payment Acceptors

Vending machines take the brunt of some very unpleasant conditions. A good many are positioned outside in the elements where dirt, smog, salts and acid rain can all make their way into the readers internal lenses and transport mechanisms. This is compounded by the fact that money itself carries oils and dirt directly into the reader. The manufacturer's of Bill Acceptor equipment recognize these factors and all recommend and describe how to clean their devices.

The Lucky Stripe Waffletechnology Bill Acceptor Cleaning Cards were developed in concert with Bill Acceptor OEM's offering almost universal acceptance. Now only one product is necessary for most Vending Machines. A product that will not only clean the acceptor of built up dirt, oils and other contaminants that constantly assault the critical optic lenses within the unit, but keep your validators performing as designed.

Available in boxes of 15
