

## Receipt Printer Cleaning Card

# Receipts Faded and Difficult for Your Customers to Read?

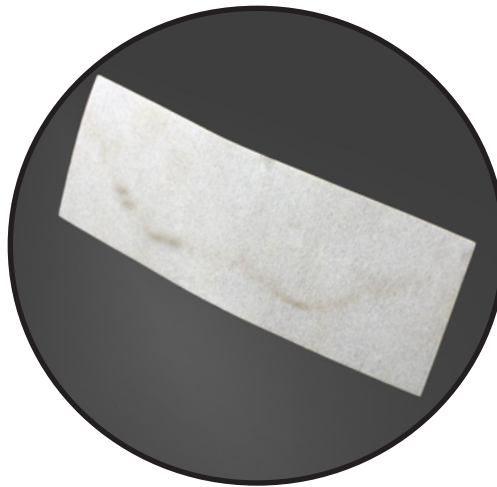

Increase the legibility of your receipts with a simple cleaning.

### How Do Cleaning Cards Work?

Cleaning card technology allows for a thorough cleaning of transaction devices, such as card and check readers, lottery ticket readers and receipt printers, without costly outside technical assistance. Used as preventive maintenance or to quickly correct device errors, these products remove dirt, and other contaminants which inhibit the device from working properly.

Each transaction device requires specific cleaning products. Choose the right product for your device for proper maintenance.

### Ideal Cleaning for

POS Receipts

Ticket Receipts

ATM Receipts

Receipt printers use thermal printing technology which is essentially a bar to "heat" the paper thereby producing the image or print. Because the heat bar or "Printhead" is extremely hot any foreign materials on the Printhead can be burned on to it. Over time both environmental and "Paper Flash" particles, will build up causing the Printhead to conduct less heat to the paper. Because less heat is transferred, the print begins to fade. Eventually the burnt on particles will damage the Printhead beyond repair.

Cleaning Cards for receipt printers are designed to remove the built on contaminants created through normal printing and environmental particles that enter the print area. All Printhead manufacturers recommend this product as a means of maintaining the legibility of the printed receipt and prolonging the life of your equipment.

Available in boxes of 25
